# Lara Vitória Machado Ribeiro

I'm a dev (Developer) in the middle of programming looking for recognition, financial independence and to become an excellent professional where I'm a reference in my area. For that, I seek professional experiences where I have the opportunity to evolve more every day.

## Pleno Front-End Developer.

## Junior Front-End Developer.

---

**Diazero Security - [03-2022 – 07-2022]**

**Epiouision IT - [11-2020 - 11-2021]**

---

Software development using ReactJs and Typescript, Redux, Hooks, Functional componentization, Clean Code project management with agile methodology (SCRUM), prototyping via Figma, code versioning with BitBucket, experiments with some libs, materialUI, tailwind, router dom, axios, react-dnd, styled-component, react-hook-form, patch-package.

Software development using ReactJs and Typescript, Hooks, prototyping via Figma, REST api, code versioning with GitHub, experiences with some libs, MaterialUI, Recharts, Router Dom, Axios, Hooks, Componentization, styled-component.

## Projects

**Project Heindall** - The project in which I left my comfort zone the most, I created a panel where you could assemble a flowchart just by dragging the lines and blocks, I created a screen that was very reminiscent of Trello and Jira, where I had the columns and cards, and I could dragging cards to the other columns and it changed the status of the cards.

## Projects

**Project BTO** - I developed dashboards with different graphic types.

**Project Prado** - I developed the entire purchasing cycle of the company, the budget, approval, quotation, finance, purchase, all divided into different user levels, much like an ERP system.

**Graduation: Analysis and  
Systems Development**

**Technician: Systems  
Development**

**Professional Initiation**
